PROJECTS

1. Quiz System (Laravel, MySQL, Tailwind CSS)

<https://skiesinformation.com/m-demoo/quiz-system/>

A fully functional Quiz System built using Laravel, MySQL, Tailwind CSS, Composer, and NPM. The system supports multiple admins, where each admin can create categories and quizzes according to their access level. All quiz data is securely stored in the database, including quizzes, MCQs, user results, and certificates. It includes complete Quiz & MCQ management, result evaluation, certificate generation, and a session-based quiz flow. Designed with a clean, responsive UI and an optimized backend using Laravel's MVC architecture.

2. StyleKart – Fashion E-Commerce Website

https://skiesinformation.com/Fashion_Website/

Designed and developed a modern fashion e-commerce website using HTML, CSS, Tailwind CSS and JavaScript. Implemented category-wise navigation (Men, Women, Kids, Footwear, Accessories), product listing cards with prices & offers, testimonials, FAQ section, and newsletter subscription, with a fully responsive and user-friendly UI.

3. Blog Website (PHP + MySQL)

A custom-built dynamic blog system helpful for updating and managing content easily. It allows users to explore blog posts by category and includes Forgot password recovery using PHPMailer.

4. To-Do List (JavaScript)

A task management app that allows users to add, delete, and mark tasks as completed. Useful for practicing real-time DOM manipulation and improving UI interactivity. Tasks are saved using local storage to maintain state even after page reload.

5. JavaScript Mini Projects

Created multiple small web apps to understand logic building and browser behavior.

STRENGTHS

- Quick Learner
- Problem solver
- Passion For Learning
